

# DISABILITY CARE

## Our consultants understand the NDIS sector and the challenges its ever changing nature brings.

Since the introduction of the NDIS, the disability sector has undergone radical change and continues to evolve. These changes have lead to drastic operational transitions as organisations shift from block funding to individual funding; or enter the market looking for a share in the growing client base.

Our consultants have been working with Disability Care organisations for many years, and have helped them navigate the transition to NDIS to ensure ongoing financial sustainability and operational efficiency. As the sector grows and changes, specialty projects such as operational reviews and business re-engineering provide competitive advantage to those looking to innovate and set themselves apart from their competition.
